## your birth occurrence alignment & insights

Venus in Capricorn is in opposition to the moon in Cancer. Oppositions represent push/pull as two sets of opposite ends of an orb. The orb represents inner emotional security and safety. Cancer with external stability and discipline. Capricorn, the work horse is to balance and movement by checking in with how you feel in your relationships along the way. You need structure to feel safe and when you feel safe, you build deeper relationships through honesty. When the orb is not in line, vulnerability with a relationship that feels secure becomes unhealthy to both parties.

Pay attention to how Jupiter in Pisces acts on your Cancer/Capricorn axis. Allow it to subtly guide your Cancer moon to grow as your placement is very safe on, but don't lose touch in what could be and the sign of what is.

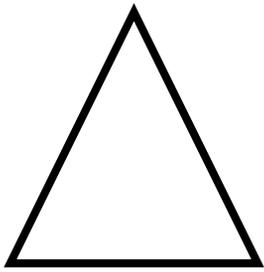

Jupiter's conjunct Saturn in Taurus. These placements work together to provide a road map as to how you can bring about innovation and change through questioning the status quo. Finding hidden sources to lead the way into something new, and doing it all with moderate determination that the other bring.

Jupiter's conjunct Saturn in Taurus and in opposition to your moon in Cancer. Includes the Taurus moon's separation and growth through action which can feel unsafe to your Cancer moon which wants to give it safe and stay home with the loved ones where it's secure. The work "be the change you wish to see in the world" comes to mind. Your subconscious desires to make the world a better place which all attempts provide safety and security for generations - which your cancer moon wants all will come by challenging the old systems or customs by taking action. Remember your moon is Mars.

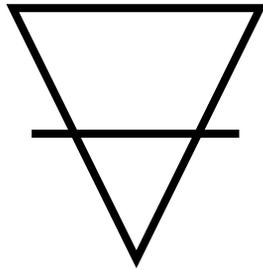

For you, I see Neptune in Capricorn as helpful even though it's in fall. Your Venus and Neptune are both in Saturn, giving these planets of softening, ideal, and dreamy ideas the structure to help the it so you don't get lost. While your moon in Cancer is in opposition at a very low degree, it needs a lot of protection as you can easily explore connection and ideas with a soft spirit.

Two new generations and your personal placement of your wife planets in these include sign with Capricorn as the anchor enable you to contribute your ideas around growth, moving forward while having set enough structure and slow down that to see them through, and be the change.

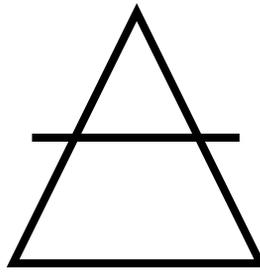

Mer in Aries is light needs your both sides, leading light and a reminder that getting where you're going, and overcoming your other in general will center around that. The planet of conflict and engagement, passion and desire - call on your placement in Aries to speak up for yourself, advocate for yourself, and make sure you feel heard. Hearing the sound will also affect your Cancer. Capricorn acts as these are all Cardinal placements.

Water is the dominant element overall, with all the elements.

Emphasis on water (4 placements) of the loss of air (only 1 placement) can speak to leading with emotions, and moderate earth (2 the placements) that may be intense but are likely grounded (2 earth placements). The lack of air can signify that you move forward with how you feel rather than with something you've taken the time to think out and write down. This doesn't mean that you don't think about things or contemplate them before speaking, just that you move more from your emotional body than your mental body.

Beginning of the cycle. Initiative, action. Starters of new ideas and new activities. Strong activation energy but can lack endurance and patience. Includes those who are brave and bold. *Cardinal*.

Middle of the cycle. The heat is on. You push with endurance, strength, strong work ethic, stability, stubborn and little change. You live with that heat and don't control. *Fixed*.

End of the cycle. High adaptability, embrace change and go with the flow. Receptive. Can be wily. Very comfortable with flexibility and moving from one phase to the next. *Mutable*.

| Mutable  | 1     | 3     | 4     |

Depending on the balance between cardinal and mutable overall, but the composite will lean most inner planets being cardinal to most outer planets being mutable. The strong strong activation energy is day to day, balanced across the elements of the inner planets, be ready to check in on what you've started to see progress before you begin something else.

lots of mutable outer planets which speak to a growth mindset, wanting to learn and evolve as a person along your journey in the life. The balances out the cardinal energy you feel have in earth, setting you when you need to change the trajectory of your life path. Again, be ready that you are checking in first, before stepping into what's next. Balance is a powerful tool.
